

Exhibit B

Dear Parents/Guardians,

This school year, your son/daughter is enrolled in a science course in which students will have the opportunity to participate in laboratory dissection of a small animal (i.e. frog or mouse) is a component. This lab activity will allow students to see how body systems, organs, and tissues interact within a real organism.

Any student that does not wish to participate will be given an alternate assignment to do during that lab time that will count “in lieu of” the lab activity.

Any student who chooses to not participate in or observation of a portion of a course shall be offered an alternative education project for the purpose of providing the student with the factual knowledge, information or experience required by the course of study. Alternative education projects include videos, models, films, books, and computers.

If you do not wish for your child to participate in such learning labs, please return the signed form to your child’s science teacher.

If you chose to allow your child to participate in dissection activities, no further action is necessary.

Thank you for your continued support.

Student Name: _____ School: _____

Science Teacher: _____ Date: _____

____ I have read the safety concerns and I would like my child to be EXCUSED from the dissection laboratory. I understand that he or she will be expected to complete an alternative assignment.
